Avoid being the next big data breach news story

To effectively manage risk, it is necessary to have enterprise-wide visibility into your organization's areas of exposure and an inventory of vulnerable sensitive information. Identity Finder Enterprise Suite arms an organization with the intelligence it needs to identify risks and prevent data leakage. Managers can discover confidential data across an entire organization, generate technical or executive summary reports, and choose whether to remediate centrally or empower employees.

Prevent Data Loss

Over the past few years, over a quarter billion personal information records were exposed, mostly due to insecure data at rest. Personally identifiable information can be anywhere and most organizations do not even know where it resides. Your reputation is at risk when you have a data breach because your employees' and customers' sensitive information is exposed. Identity Finder Enterprise Suite automatically finds confidential data and puts you in control to minimize the risk of data loss.

Protect and Comply

You have an obligation to protect sensitive information. Nearly every state has already enacted privacy or data breach laws while significant federal and industry regulations (i.e., HIPAA, PCI, FERPA, GLBA, FISMA, Sarbanes-Oxley, Red Flag Rules, 201 CMR 17.00, etc.) also require compliance with privacy standards. Identity Finder helps you comply with these regulations and prevent data breaches by fixing the problem at the source.

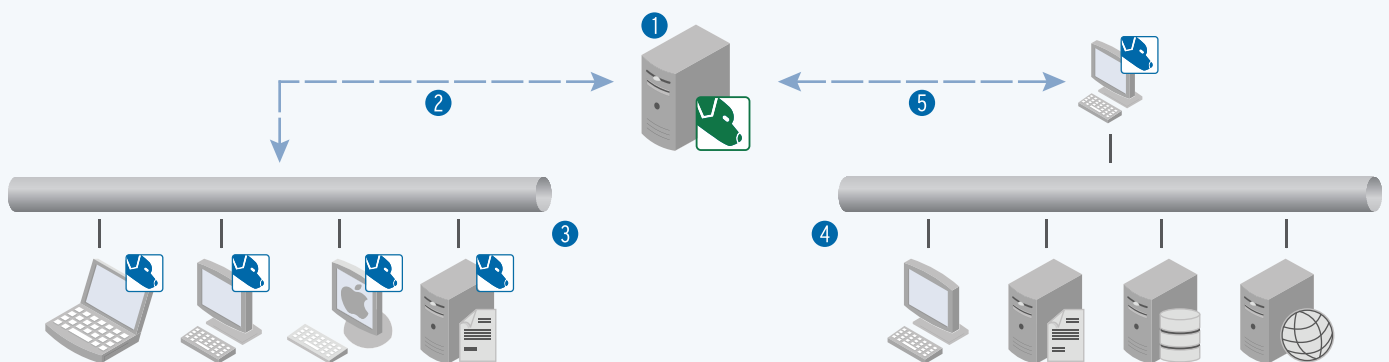

Find Sensitive Data

Windows, Mac,
File Servers, E-Mail,
Databases, and Websites

→ Manage the entire life cycle of confidential information

DLP Architecture

Legend:  Enterprise Client  Enterprise Console

1) Enterprise Deployment

Centrally manage your deployment via roles based access control.

2) Policy Management

Configure your Clients' settings, schedule searches and search on-demand.

3) Client Remediation

Search Windows and Mac systems and empower employees to remediate unprotected data.

4) Agentless Search

Remotely search databases, websites and other servers without installing Clients.

5) Centralized Reporting

Generate detailed technical reports and executive summaries to assess risk.

Search

- Windows Desktops & Servers
- Mac Desktops
- SAN & NAS Devices
- Unix & Linux File Systems
- SQL, Oracle, & Other Databases
- Websites
- All File Types
- E-Mail Messages & Attachments
- Web Browsers & System Areas

Discover

- Social Security Numbers
- Credit and Debit Card Information
- Bank Account Information
- Payment Card Industry Data (PCI)
- Patient Health Information (PHI)
- Passwords, Worldwide Identities
- Driver Licenses, Personal Addresses
- Dates of Birth, Phone Numbers
- Any Custom Pattern or Sensitive Data

Comply

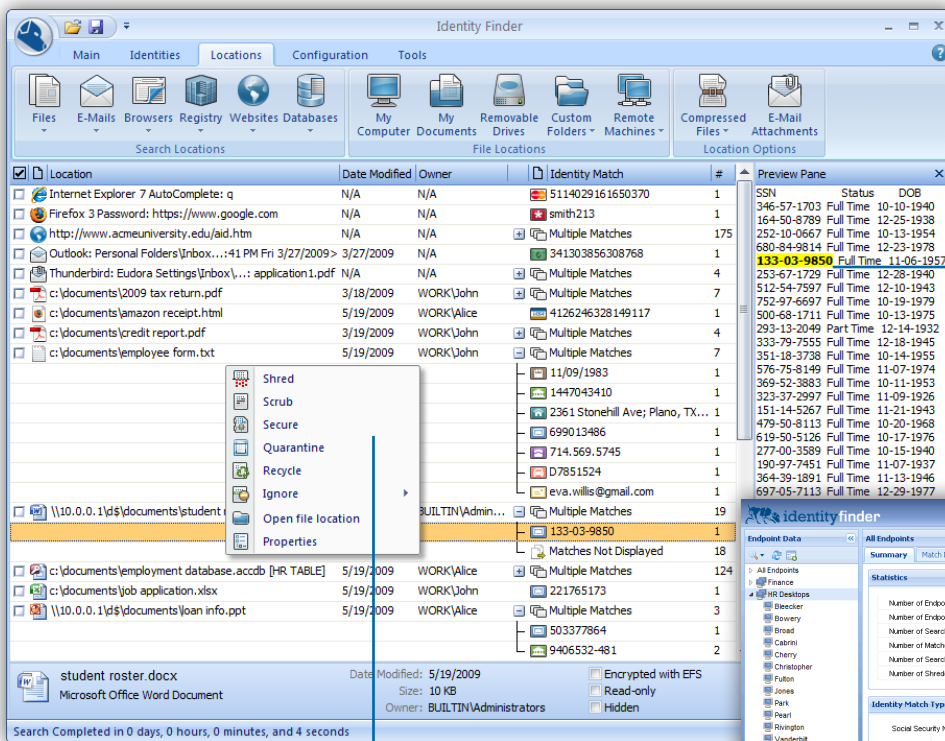

- Centralized Reporting
- Policy Management
- Scheduled and On-Demand Searching
- Agentless or Agent-based
- Customized Deployment
- Digital Shredding
- Scrubbing & Redacting
- Encrypting
- Quarantining

Client for Windows | Client for Mac | Enterprise Console

Identity Finder helps organizations prevent data loss by finding and protecting sensitive information. The AnyFind™ engine automatically discovers confidential data stored on desktops, servers, remote computers, databases, websites, and removable drives. Beyond identification, end users are given the tools to Shred, Scrub, Secure, and Quarantine unprotected information.

Requirements:

Client: Windows (x86 or 64bit) version 7, Vista, XP, Server 2000 or higher; Mac OS X (Intel) Snow Leopard, Leopard, or Tiger (10.4.2 or higher).
 Console: Windows Server 2003 or higher with IIS. SQL Server 2005 or higher (Express/Enterprise).

Remediation menu options: Shred, Scrub, Secure, Quarantine, Recycle, Ignore, Open file location, Properties.

The Client interface is easy to use by administrators and end users. Find and protect sensitive information across many computers.

The Client's remediation features allow end users to Shred, Redact, Encrypt, and Quarantine unprotected data.

The Console's Dashboard view provides access to executive and technical reports, Client policies, and Client status.
