Identity Finder *How it Works*

1 | Get Identity Finder

Get your complimentary activation code from your university's internal software distribution site:

01234-ABCDE-56789

Download Identity Finder Home at:

www.identityfinder.com/download

Run the Installer

2 | Search Your Desktop

Run Identity Finder by going to

Start → Programs → Identity Finder

Use the Wizard to search for unsecured sensitive data, such as social security numbers, passwords, and credit cards

Let Identity Finder automatically find anything that could be used to commit identity fraud against you

3 | Protect Your Identity

Shred files you don't need containing your sensitive information

Scrub private data in files you want to keep

Secure important files that contain private data
